PREFACE

The launch of the National Literacy Mission (NLM) in 1988 has been a milestone in the way of imparting functional literacy to millions of Indians across the country. The NLM has laid down that for the successful implementation of Total Literacy Campaign a rigorous evaluation should be carried out in two stages. First, the concurrent evaluation which is to be carried out in the mid-way of campaign and the second is the final evaluation which is to be conducted after the completion of the campaign. The idea behind concurrent evaluation is to detect shortcomings and deficiencies of the campaign while it is going on in order to take corrective steps to make the programme effective and result oriented as per guidance of the NLM. The final evaluation of the Total Literacy Campaign is to be conducted after the end of the campaign so that the achievements could be assessed and if found satisfactory next phase of literacy programme, i.e. post-literacy programme, could be implemented.

The Total Literacy Campaign came to an end on December 31st 2004 in Pakur district of Jharkhand. The Nawa Marshal Zila Shaksharta Samiti, Pakur commissioned the Giri Institute of Development Studies, Lucknow to undertake the final evaluation of the campaign. The Institute conducted the evaluation following the guidelines of National Literacy Mission (NLM).

I take this opportunity to express my gratitude to Mr. Vaidehi Sharan Mishra, IAS, Deputy Commissioner, District Pakur and President of Zila Shaksharta Samiti, Pakur for selecting our Institute to conduct the final evaluation of Total Literacy Campaign launched in the district. He has been kind enough to provide all necessary support during the evaluation despite his busy schedule.

I am thankful to Mr. Madan Sen Gupta, JAS, Deputy Commissioner, Jharkhand, for his keen interest in the evaluation and extending all required support.

I have a deep sense of gratefulness to Mr. Bhaskar Sarkar, Secretary, Zila Shaksharta Samiti, Pakur, who is a dedicated, sincere and devoted officer for extending all support during the evaluation. I feel that without the sincere support of Mr. Sarkar, the evaluation task would have been quite difficult for us.

The other officials of the ZSS, namely, Mr. Pappuji, have been quite friendly and helpful during the evaluation process. I am thankful to all the coordinators, KRPs, MTs and Volunteers of the campaign, who took keen interest in evaluation and devoted their time with us during the evaluation.

CONTENTS

LIST OF TABLES

LIST OF ANNEXURES

EXECUTIVE SURVEY

Total Literacy Campaign in Pakur District, Jharkhand

1.	Percentage of Learners made literate as against the target group	56.85
2.	Percentage of Learners made literate as against enrolled learners	70.46
3.	Date on which results of door to door survey was finalized	15.02.2002
4.	Total number of non literates as per this survey	199840
5.	Total number of non-literates enrolled	165155
6.	Date of sanction of the Project	30.05.2002
7.	Date of commencement of this project (Date of receipt of draft of first installment from Government of India)	21.11.2002
8.	Date of Completion of TLC	31-12-2004
9.	Duration of teaching/learning process	2 years
10.	Date on which evaluation contract signed with District Administration by evaluation agency	13.12.2004
11.	Date on which evaluation process started	04.01.2005
12.	Date on which final report handed over to District	05.02.2005
13.	Size of planned sample	8070
14.	Size of actual sample	8070
15.	Total number of proxy learners	141
16.	Percentage of sample learners who qualify as per NLM norms	75.35
17.	Percentage of learners out of genuine learners (appeared-proxy) who qualify as per NLM norms	76.69

BACKGROUND DATA

Total Literacy Campaign in Pakur District, Jharkhand

1. Date of Sanction of Pakur   :   30.05.2002

2. Date and Number of Learners Identified :   15 February, 2002
    After Door to Door Survey

                                                                    1,99,840

3. Break-up of Target and Enrolled Learners:

	Male	Female	Total	SC	ST	Minorities	Others
Target	90541	109299	199840	8483	112248	48363	30746
Enrolled	73255	91900	165155	7082	86624	44654	26795

4. Age-group of Target Learners   :   15-35 years
                                                                    199840

5. Teaching-learning Dates   :

        (a) Starting Data   :   22 December, 2002

        (b) Completion Data   :   31 December, 2004

6. Total Period of Teaching in Months   :   Approximately two years

7. Total Number of Learners Studying Primer-III   :   27967

8. Total Number of Learners Who Completed Primer-III :   133282

9. Total Number of Blocks in the District   :   6

10. Total Number of Gram Panchayats/village   :   1124

CHAPTER - I

INTRODUCTION

1.1 BACKGROUND:

It has been universally accepted that illiteracy is a serious obstacle in the socio-economic development of any society. An illiterate person remains surrounded by the vicious circle of ignorance which prevents him to take greater advantage of various developmental programs initiated by the Government. Therefore, literacy becomes can instrument of empowerment and awareness generation. The benefits of literacy are supposed to accrue privately to the individuals who become literate. Impact on the individual is linked to the aggregate benefits that mass literacy brings to the society as a whole. In this way, mass literacy can take a society to a new shape of development. With this core objective, a National Adult Education Programme (NAEP) was initiated on 2nd October 1978 in the country. The progress under the programme was a mix of success and failure. Therefore, to make this programme more effective and result oriented, the Government of India constituted National Literacy Mission (NLM) on 5th May, 1988 to place "Functional Literacy for All" on the National Agenda through the Total Literacy Campaign (TLC)

1.2 TOTAL LITERACY CAMPAIGN (TLC):

The National Literacy Mission (NLM) was launched in 1988 to impart Functional Literacy to around 80 million illiterate people in the age-group of 15-35 years by 1995.

GIDS, Lucknow

Subsequently, changes were made in the target to include 100 million people to be made literate in the same age group by the year 1991 and full literacy to be achieved by 2005.

In 1989. a voluntary agency the Kerala Shastra Sahitya Parishad (KSSP) asked to NLM for financial assistance for a mass campaign in Ernakulam district, Kerala. Thus, the first Total Literacy Campaign (TLC) began in Ernakulam district on January 26, 1989, and from this experience was evolved the model of Total Literacy Campaign for mass literacy. The Total Literacy Campaign has been conceived as a programme not of any particular department, but it depends on the collective cooperation of the Government, non-Government, social and institutional organsations.

Total Literacy Campaign (TLC) is a Volunteer based programme. An over-riding preference has been given to Voluntary Agencies (VAs) to take up area specific, time bound, cost effective and result oriented plan for eradication of illiteracy. The important Components in this programme are (i) Total Literacy Campaigns (TLCs), (ii) Post-Literacy Programmes (PLCs) and (iii) Self-directed Continuing Education (CE) in the perspective of lifelong learning.

The experience of the past few years shows that while the literacy campaigns have achieved remarkable success in several districts across the country, there have also been quite a few districts where the campaigns have floundered for a variety of reasons.

The Department of Education in the Ministry of Human Resource Development, Govt. of India constituted in April 1983 a six member expert group under the chairmanship of Prof. Arun Ghosh, to undertake a status-cum-impact evaluation of literacy campaigns, launched in different parts of the country. In addition to general recommendations, the expert group made specific suggestions about monitoring and evaluation procedures. It specially recommended that evaluation of literacy campaigns

needs to be conducted not only with a credible methodology but also in the right spirit. The purpose was to provide an objective and reliable feed-back to local organizers about the present status of Campaigns, their strength and weakness, so that remedial measures could be promptly taken. The group also suggested a broad framework for evaluation of Literacy Campaigns.

1.3 EVALUATION SYSTEMS UNDER NATIONAL LITERACY MISSION:

Self evaluation of learning outcomes of the enrolled learners has been built into the body of the three primers. Each primer contains three tests and it has been assumed that if a learner attempts these tests he/she will have a fairly reliable idea of his learning weaknesses. This self-evaluation would enable the learner to perceive his/ her own pace and progress of learning and should heighten his/her motivation.

Besides self evaluation of learners, every campaign district is subjected to two more evaluations namely "Concurrent Evaluation" which is to be carried out by agencies within the State but outside the concerned district and "Summative of Final Evaluation" to be carried out by agencies outside State. Concurrent Evaluation will focus on various activities in the process of implementation of the programme such as survey, environment building, training etc. so as to detect bottleneck shortfalls and deficiencies and suggest corrective measures to ensure optimum efficiency. Summative Evaluation which is normally executed at the end of the programme, will mainly focus on learning outcomes, success rate vis-à-vis the target and the impact of the campaign on the teaching-learning. The new approach of evaluation adopted by the NLM is aimed at ensuring complete transparency and, thus, enhancing the credibility of the result declared.

1.4 GENESIS OF FINAL EVALUATION OF TLC:

The National Literacy Mission aims at imparting functional literacy in concrete terms. The functional literacy implies :

- ◆ achieving self-reliance in literacy and numeracy,
- ◆ becoming aware of the causes of their deprivation and moving towards amelioration of their condition through organization, and participation in the process of development.
- ◆ acquiring skills to improve the economic status and general well-being,
- ◆ imbibing the values of national integration, conservation of the environment, women's equality, observance of small family norms etc.

Ideally, the attainments of the learners need to be evaluated in respect of above goals. Nevertheless, while 'functionality' and ' awareness' constitute important elements of functional literacy and would require to be evaluated, the present stage of the programme in TLC areas suggests that it may be enough for the present to evaluate the learning outcomes in 3RS and assume that these will automatically develop gradually if they reach NLM norms. Moreover, if IPCL package is properly used, and tests are organised, these would indirectly indicate the changes in the areas of ' awareness' and 'functionality'. Similarly, the passage meant for Reading and questions on Comprehension could be so framed as to indicate the possible level of information as part of awareness generation.

As far as literacy is concerned (which is the immediate goal of TLC), it has to be stated that no person should be declared literate unless he/she reached the NLM norms. Tools and instruments for evaluation of learning outcomes should be such as to help us in knowing what the learners could learn, rather than find out what is not known to them or what they have not learnt at all. Therefore, a dichotomous classification of learners into

literates and illiterates was not favoured. It was felt that the performance of the learners should be described by ranges of scores obtained by them in reading, writing and numeracy skills, separately and also in aggregate.

1.5 PROCEDURE OF FINAL EVALUATION OF TLC:

In view of the large scale operation of the Total Literacy Campaigns in the country and dearth of professionally competent persons who could be associated in evaluation of learning outcomes, evaluation procedures have to be simple and systematic and at the same time technically sound. The systematization proposed is in respect of (i) Test design or Blue Print (ii) Weightages to different components of literacy (iii) Cut-off-point (iv) Flexibility within basic framework, (v) Mode of administration of tests and dissemination of results.

(i) TEST DESIGN:

The test design will be aligned to the competencies that the learners are expected to master on the conclusion of the basic literacy state. It is assumed that each learner who has participated in the programme would show some change and the test should help in understanding these changes and also determine who will have become literate as per norms of NLM. The test design refers to each of the Competencies in Reading, Writing and Numerarcy, manner of testing, scoring etc.

(ii) WEIGHTAGES AND CUT OFF POINTS :

Assuming that Reading is a more frequently used skill, it has been given slightly higher weightage. Thus 'reading' has been given a score of 40 and writing and numeracy are given a score of 30 each, the total score for the test being 100. It is stipulated that each of the competencies would be tested in each, the minimum required score would be

50% of the maximum. However, for being declare literate, a person should have a minimum of 70% in the aggregate. No separate weightage has been given to Reading speed because it is felt that reading speed is connected with comprehension. If a person is too slow in reading and is able to proceed haltingly or jerkingly, the comprehension suffers. Regarding the cut-off-point, it was felt that if 70% is kept as the cut off level, it should meet the proficiency requirements as per NLM norms.

(iii) FLEXIBILITY WITH BASIC FRAMEWORK:

Since the design of the test is aligned to the competencies under NLM, it is necessary that for every competency, the testing situation is identified from the topics covered in the primer and to that extent there would a built in flexibility in the test design.

1.6 OBJECTIVES OF FINAL EVALUATION OF TLC:

It is important to understand the broad objectives and purpose of final evaluation of Total Literacy Campaign so that such evaluation may be conducted not only with a credit methodology but also in the right spirit. The followings are the major objectives set by NLM:

1. To provide an objective and reliable assessment of the literacy achievements.

2. To provide feedback to local organizers about the outcome of the Campaign, its strength and weakness and suggest remedial measures.

3. To provide academic inputs into the policy and planning of literacy campaigns at the State and Central levels.

1.7 METHODOLOGY:

The Nawa Marshal Zila Sakhsharata Samiti, District Pakur, Jharkhand started the Total Literacy Campaign on 21 December, 2002. The Campaign was completed on 31

December, 2004. The campaign was launched in all the six (6) blocks of the district and, in the urban area of Pakur Nagarpalika. A total of 1,99,840 learners in the age-group of 15-35 years were identified through the survey conducted during 13,14 and 15 February, 2002 in the entire district. Out of the Total target, 1,65,155 learners constituting 82.64 per cent were enrolled for teaching learning. The teaching-learning was completed on 31 December, 2004. By this date, 1,33,282 learners completed P-III and 27,967 learners were at P-III.

1.7.1 SAMPLING:

The NLM guidelines have recommended the following broad criteria for sampling.

1. Village/ward will be the last unit of sampling Village means the 'Panchayat Village' and not the 'Revenue Village.'

2. Stratification of SC/ST/Minority learners where the pockets of these groups are found (more than 50 per cent).

3. Attempt should be made to cover at least 70 per cent of the learners in a sample village.

4. The sample size would be 5 per cent of the universe; subject to maximum of ten thousand (10,000) learners.

5. A higher sample should be drawn to take care of sample loss.

6. At least one or two contingent villages in each block should be selected randomly.

7. The universe for the purpose of drawing the sample for testing the learners will be the learners studying Primer-III and those learners who completed Primer-III.

On the basis of above guidelines set by the NLM, following sampling procedure was followed for the selection of learners in Pakur District:

(i) It was decided to take up 5 per cent of Total learners as sample. Accordingly, 8062 learners were selected as sample for testing their learning skill in 3RS.

(ii) The sample of 8062 learners was drawn from the those learners who have completed P-III + those learners who are at P-III. Thus, the sample combined from both type of learners.

(iii) The 'Panchayat Village' was considered as the last unit of sampling not the Revenue village.

(iv) The sample was stratified where ST/SC/minority learners predominated.

(v) The sample learners were drawn from all the six development blocks and Pakur Nagarpalika according to their proportionate shares in total sample learners (P-III Completed + P-III studying.

(vi) Accordingly, the share of each of six (6) blocks in total sample learners was as shown in Table I.1.

Table I.1: **Block-wise Learners Completed P-III, at P-III and Sample Learners of Pakur District, Jharkhand**

Sl. No	Block	Learners Completed P-III	Learners at P-III	Total P-III Learners	Sample Learners
1.	Pakur	40977	7721	48698	2435
2.	Hirnapur	14145	5079	19222	960
3.	Littipara	11414	4126	15540	778
4.	Amrapara	10802	3816	14618	732
5.	Maheshpur	34942	6447	41389	2069
6.	Pakudiya	21002	780	21782	1088
	Total	133282	27967	161249	8062

Soruce : Nawa Marshal Zila Shaksharta Samiti, Pakur district, Jharkhand

(vii) After deciding the number of sample learners to be tested in each block, sample villages in each block were choosen from where the required number of learners were to be tested. Such villages were selected randomly in each block and efforts were made to select 3-4 villages in every block from where required learners could be available for testing. The probability of sample loss was also kept in mind.

(viii) On the basis of random selection procedure, learners from the villages as show in Table I.2 were tested.

(ix) All possible care was taken that at least 70 percent of the total P-III learners in each sample village are put to test.

GIDS, Lucknow

1.8 TEST PAPERS :

The test papers in Writing, Reading and Arithmetic were designed as suggested in the Dave Committee report of National Literacy Mission and annexed in the guidelines for Final Evaluation of TLC districts. However, some passages of P-III- 'Apni Kitab', used in teaching-learning by the ZSS, Pakur were incorporated in the test papers, replacing the same of model test papers.

1.9 TEST ADMINISTRATION :

'Test was conducted with full participatory approach by the well trained Test Administrator (TAs).

1.10 PROXY LEARNERS:

Proxy learners were identified on the basis of suggestions given in the guidelines of NLM. However, it was observed that cases of Proxy Learners were minimal as most of learners were found to be the genuine and seriously taking interest in test administration.

CHAPTER - II

TOTAL LITERACY CAMPAIGN IN PAKUR DISTRICT: AN OVERVIEW

II.1 INTRODUCTION:

The Pakur district of Jharkhand has been at the lowest rank among all the districts of state in terms of male, female and total literacy. According to 2001 census, literacy rates in Pakur district in case of males, females and total population had been 40.19 per cent, 20.44 per cent and 30.54 per cent respectively, while the same were 67.94 per cent, 39.38 per cent and 54.13 per cent respectively, at the state level. In this situation, successful implementation of Total Literacy Campaign in Pakur district and that too in the district where tribal population predominates assumes utmost significance.

The project of Total Literacy Campaign for Pakur District was sanctioned on 30 May, 2002 by the NLM. However, the teaching-learning was started in the month of December, 2002. The survey to identify target learners was completed by 15 February, 2002. The campaign was completed by 31 December, 2004.

II-2 TARGET LEARNERS:

The survey conducted from door to door identified 199840 illiterates in the age-group of 15-35 years as target learners. Around 55 per cent of the identified target

GIDS, Lucknow

learners had been the women. The block-wise ranking in terms of number of target learners, Pakur block was first followed by Maheshpur, Pakudiya, Littipara, Hiranpur and Amrapara blocks. Among the target learners, 165155 learners (82.64 per cent) could be enrolled for teaching-learning. In case of enrolled learners block-wise ranking Pakur block was first followed by Maheshpur, Pakudiya, Hiranpur, Littipara and Amrapara blocks.

Table II.1: **Target and Enrolled Learners of ZSS, Pakur, Jharkhand**

S.No		Target Learners			Enrolled Learners		
	Block	**Male**	**Female**	**Total**	**Male**	**Female**	**Total**
1.	Pakur	26731	29291	56022	23129	23574	49703
2.	Hiranpur	10624	12386	23010	7669	12370	20039
3.	Littipara	10839	13252	24091	7030	8765	15795
4.	Amrapara	9286	11172	20458	5917	8701	14618
5.	Maheshpur	20629	26479	47108	19695	22626	42321
6.	Pakudiya	12432	16719	29151	9815	12864	22679
	Total	90541	109299	199840	73255	88900	165155

Source: Nawa Marshal, Zila shaksharta Samiti, Pakur, Jharkhand

Thus, it appears that ZSS, Pakur has been successful in enlisting large number of target learners for teaching-learning despite facing several constraints in terms of difficult employment conditions of males and females in quarrying, agriculture and non-agricultural activities which require hard manual labour and migration out side the village. In Table II.1, block-wise male, female and total target and enrolled learners of ZSS, Pakur has been presented.

II.3 ENROLMENT OF SCHEDULED TRIBES/CASTES:

As reported by the ZSS, a total of 86624 ST and 7072 SC learners were enrolled. The largest number of 24332 ST learners were enrolled in Maheshpur block, followed by 18002 ST learners in Pakudiya, 13152 ST learners in Amrapara, 12251 ST learners in Littipara, 9708 ST learners in Pakur and 9179 ST learners in Hiranpur blocks. As far the SC learners were concerned, highest number of 2617 were enrolled in Pakur block followed by 1739 SC learners in Hiranpur block, 1374 SC learners in Maheshpur block, 603 SC learners in Pakudiya block, 458 SC learners in Amrapara block and 281 learners in Littipara block. In this way, ZSS Pakur appears to have been successful in enrolling the SC and ST learners in proportion to their population. The ZSS seems to have been successful in enrolling those learners who were mostly illiterate and socio-economically backward. The block-wise enrollment of ST and SC learners has been as shown in Table II.2.

Enrollment of ST Learners

Enrollment of SC Learners

No. of Learners (y-axis): 0, 1000, 2000, 3000, 4000, 5000, 6000, 7000, 8000

Name of Blocks (x-axis): Pakur, Hiranpur, Littipara, Amrapara, Maheshpur, Pakudiya, Total
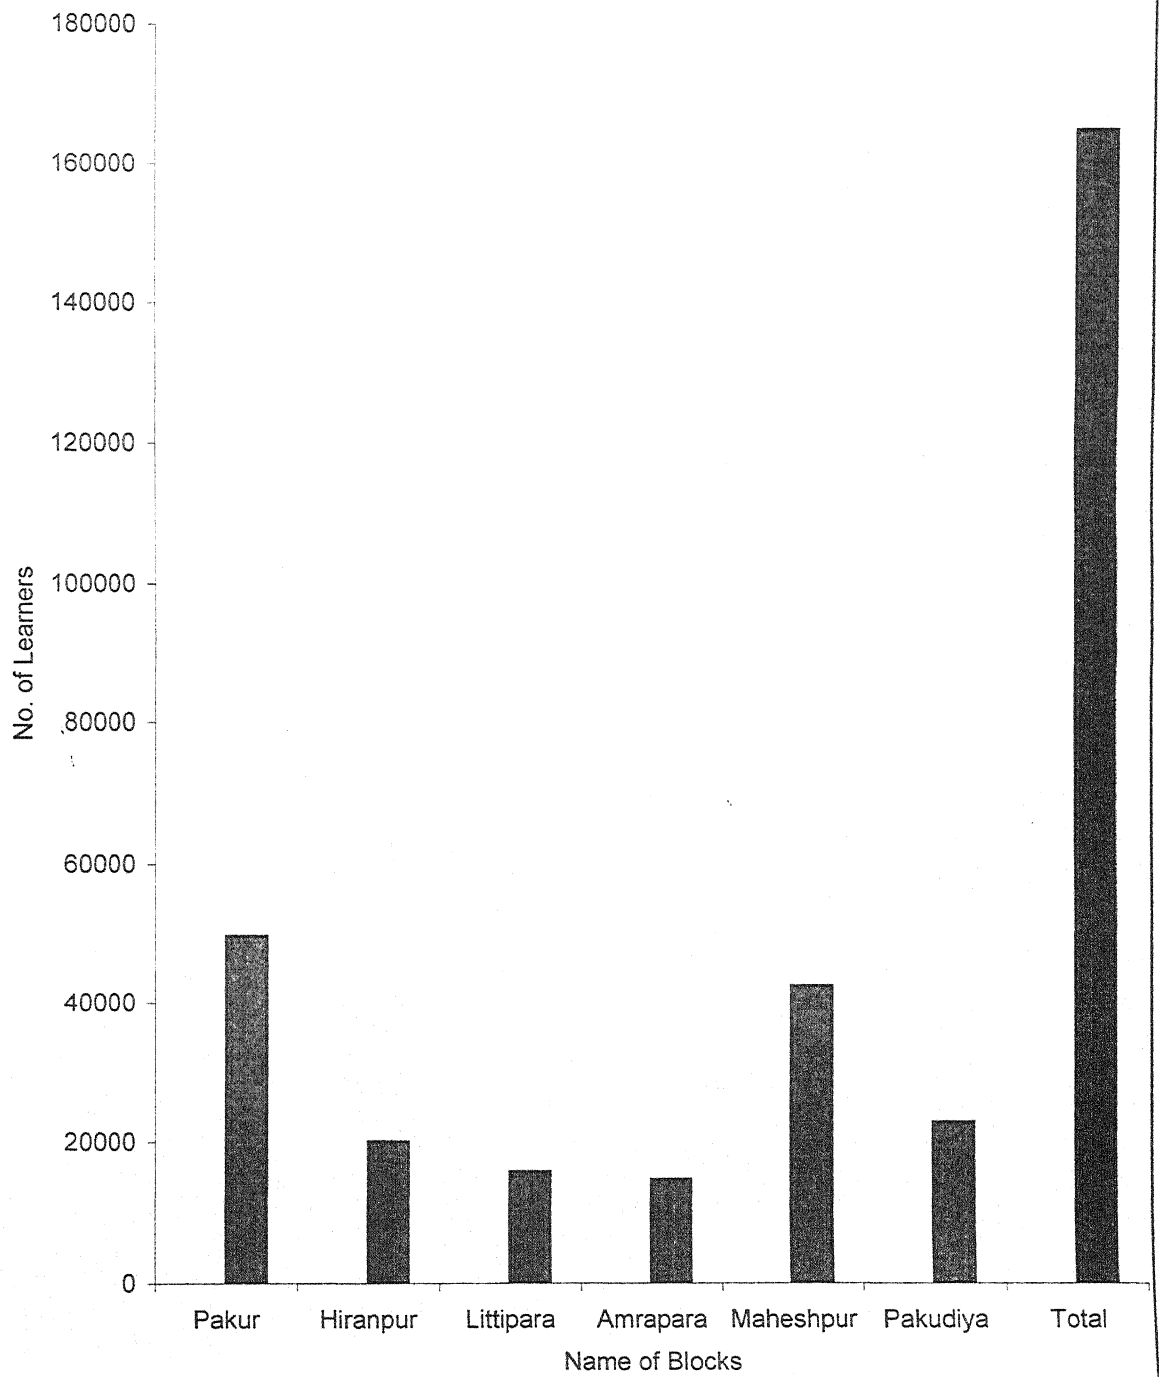

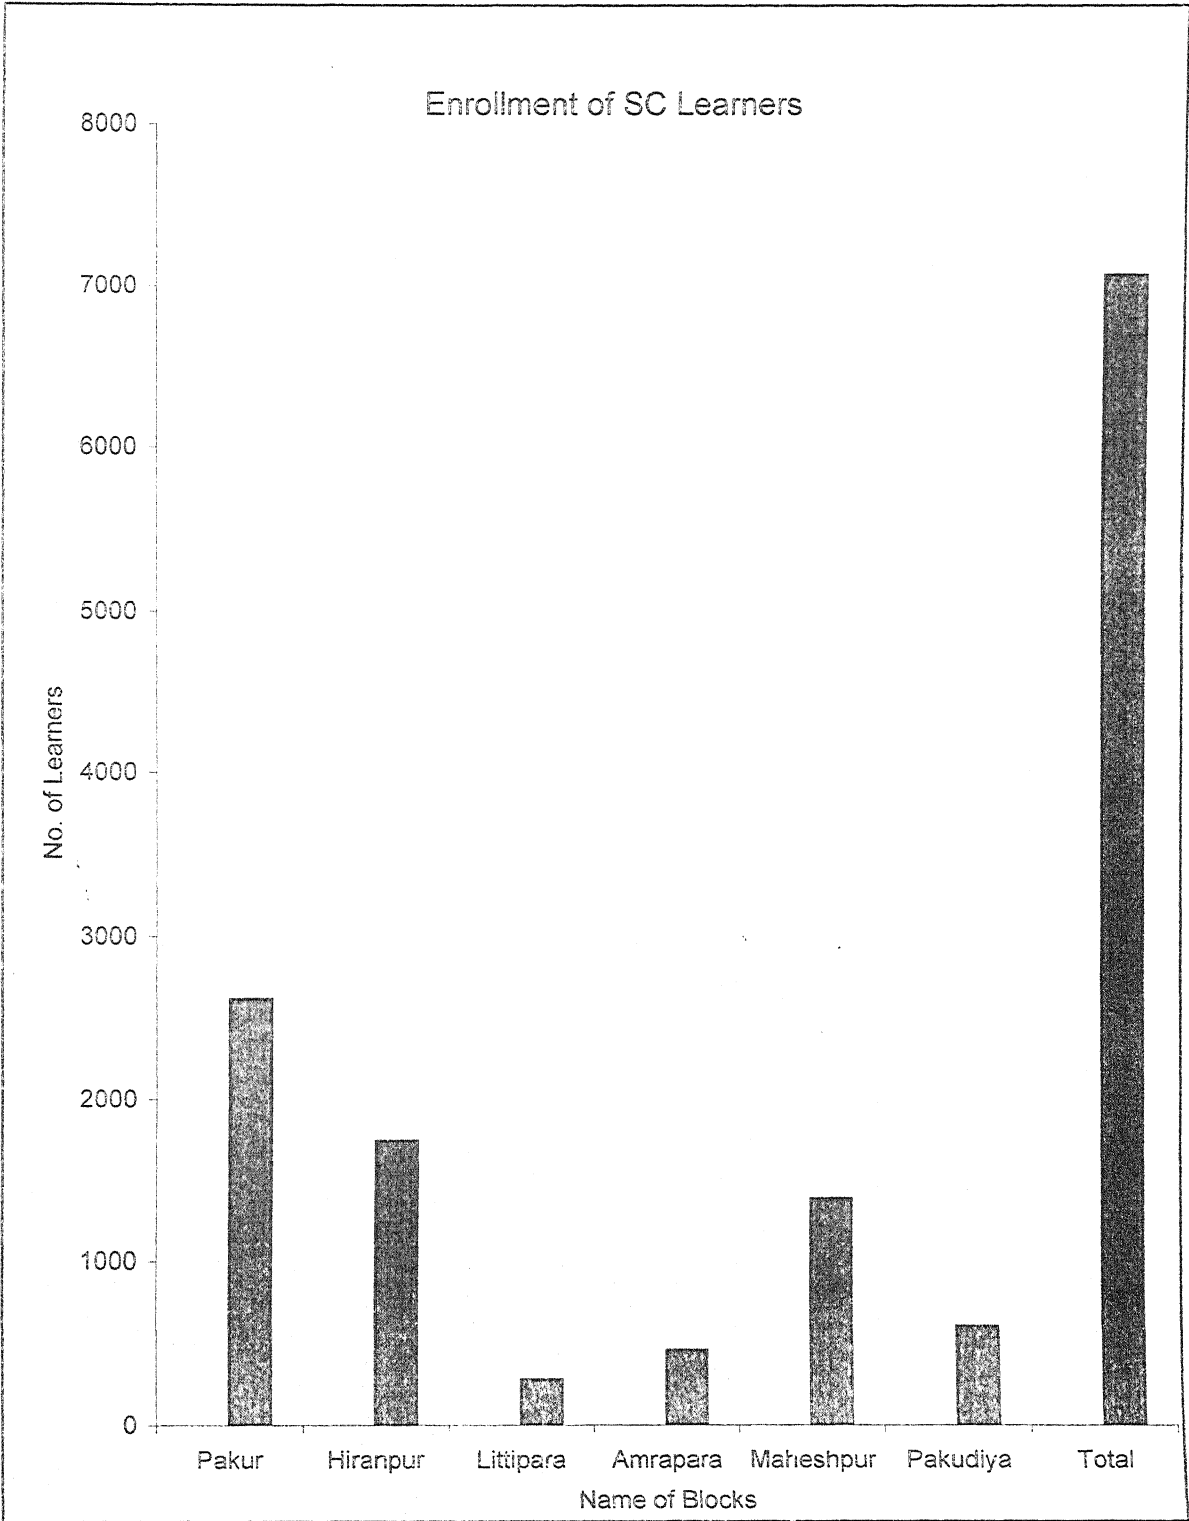

II.4 PRIMERS COMPLETED:

As reported by the ZSS, all the enrolled learners have completed Primer-I and Primer-II in each of the six blocks of the district. Out of the total enrolled learners, more than 80 per cent reported to have completed Primer-III. The block-wise learners who have completed P-III were as follows :

Table III-3: **Block-wise Learners Who Completed Primer-III: ZSS, Pakur, Jharkhand**

S.No	Block	Total	Male	Female	SC	ST
1.	Pakur	40977	18001	22976	2521	9237

	Total	133282	57289	75993	6213	73728

Source: Nawa Marshal,Zila Shaksharta Samiti, Pakur, Jharkhand

The data provided by the ZSS, Pakur suggests that 27967 learners were still learning P-III. The block-wise number of such learners of different groups were as follows:

Table II-4: **Block-wise Learners Who Were Still Learning P-III: ZSS, Pakur, Jharkhand**

S.No	Block	Total	Male	Female	SC	ST
1.	Pakur	7721	4818	2903	104	246

Learners Who Complted Primer-III
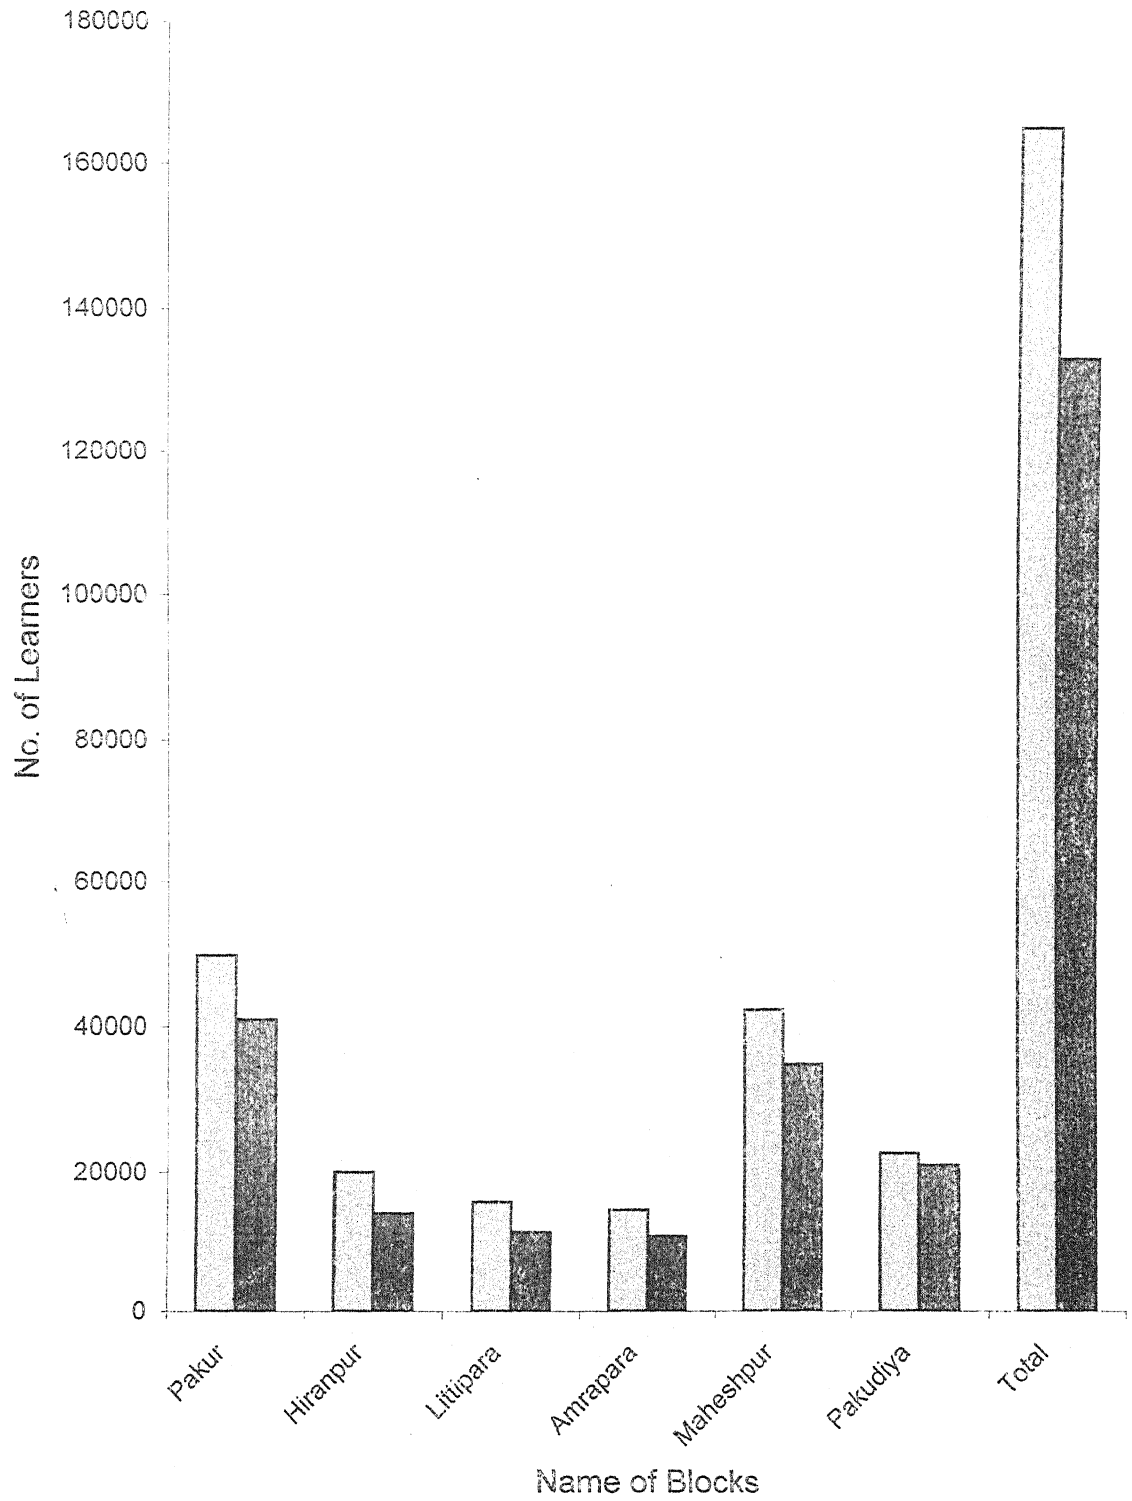

Learners Who are still at Primer-III
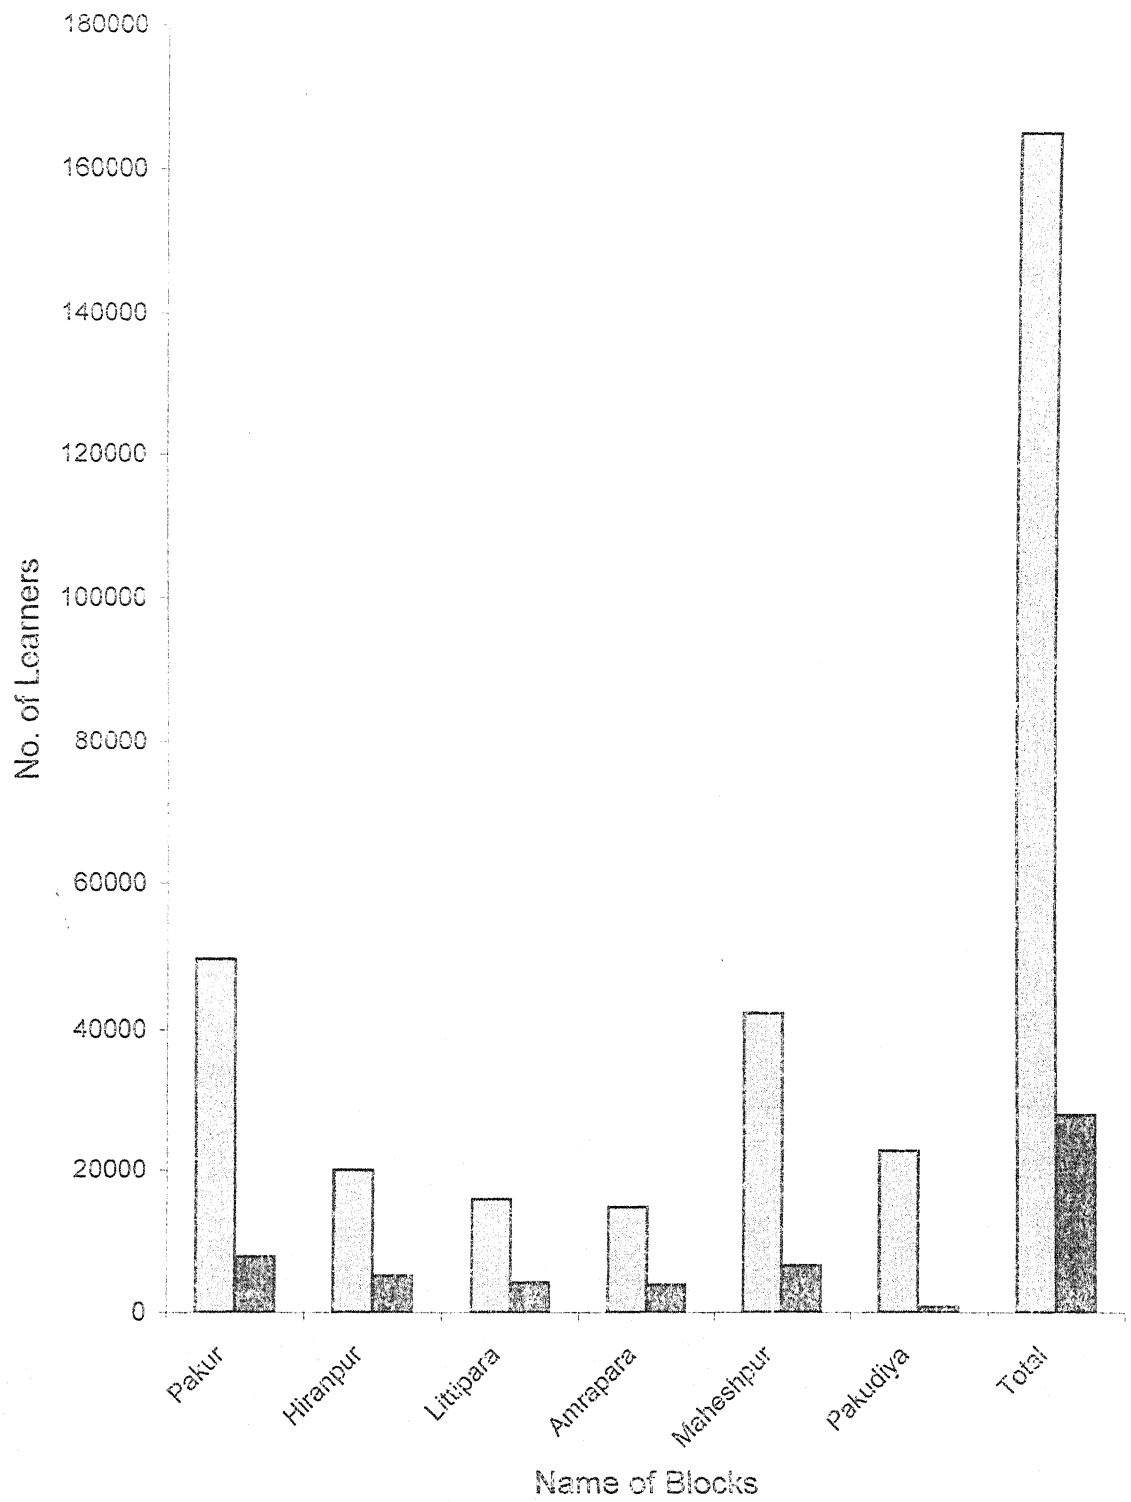

However, above figures were computed by the ZSS, Pakur before the Final Evaluation of TLC was undertaken during January 4-12, 2005. It was observed during the testing of learners that most of those who were reported to be learning P-III have completed P-III. It was told by VT's and learners during field visits to each of six blocks that the Secretary of the ZSS has been endeavoring to mobilize such learners to complete P-III. It could become evident to us that across all the six blocks effort of the ZSS in this direction has been remarkably successful.

II.5 KRP's, MTs and VTs :

We observed a very good net work of KRP's, MTs and VTs developed by the ZSS, Pakur during our visit to development blocks. It was noticed that most of KRP's, MTs, and VTs were present during the testing of learners. They seem to be active, enlightened and enthusiastic in teaching to learners. We are in view that ZSS, Pakur managed the TLC by developing a good network of volunteers. It was also reported by the different volunteers that they attended several training programmes organised by the ZSS. The total number of KRP's, MTs and VTs involved by the ZSS Pakur in the Campaign were as follows:

Table II.5: **Block-wise Number of KRP's, MTs, and VTs involved in the TLC Campaign: ZSS, Pakur, Jharkhand**

S.No	Block	KRPs			MTs			VTs

GIDS, Lucknow

II.6 ENVIRONMENTAL BUILDING MEASURES:

The ZSS, Pakur adopted several measures to create an atmosphere for awakening a need of literacy among the masses of the district. The initiatives included wall writing, distribution of pamphlets, organizing workshops/meetings/seminars and various sports events. The ZSS reported to have organised rallies from time to time. The cycle rally organized by the ZSS during September 18-23, 2003 in entire district was a memorable event that evoked greater enthusiasm among the masses. During the course of testing of learners during January 4-14, 2004, research team of the Institute tried to observe the impact of environmental building activities of the ZSS, Pakur on the learners. It became apparent that various measures taken by the ZSS in this regard generated enthusiasm among the learners to understand the importance of literacy. By and large the learners reported to be aware of the environmental building activities of the ZSS, Pakur.

II.7 TEACHING-LEARNING MATERAILS:

The ZSS, Pakur used 'Apni Kitab' primers in the TLC. The primers were procured from ADRI Resoruce Centre, Ranchi. The other materials required for teaching-learning like slates, pencils, copies etc. were also given to learners by the ZSS. The Block Development Officers (BDO's) were involved in the distribution of materials. During the field visit, it was inquired by us from the learners about their satisfaction of receiving the teaching-learning materials from the ZSS. The learners reported to have received the teaching-learning materials in time and they were in view that the quality of materials supplied to them was satisfactory.

II.8 SUCCESS RATE OF LEARNERS IN CONCURRENT EVALUATION:

The concurrent evaluation of Total Literacy Campaign of Pakur district was undertaken by the Vikas Bharti, Research and Study Centre, Ranchi during June-July, 2004. The result of the learners tested as reported by the Vikas Bharti showed remarkable success of learners who have achieved the NLM norms. The result presented by the Vikas Bharti indicated that more than 78 per cent tested learners achieved the NLM norms. The success rate was more or less uniform across different caste-groups, age and gender. The details of the result as reported by the Vikas Bharti have been shown in Table-6 and Annexure-I and II.

Table II-6: **Block-wise Success Rate of Learners As Per Concurrent Evaluation in Pakur District, Jharkhand**

Success Rate of Learners as per Con-Current Evaluation of TLC, District Pakur, Jharkhand
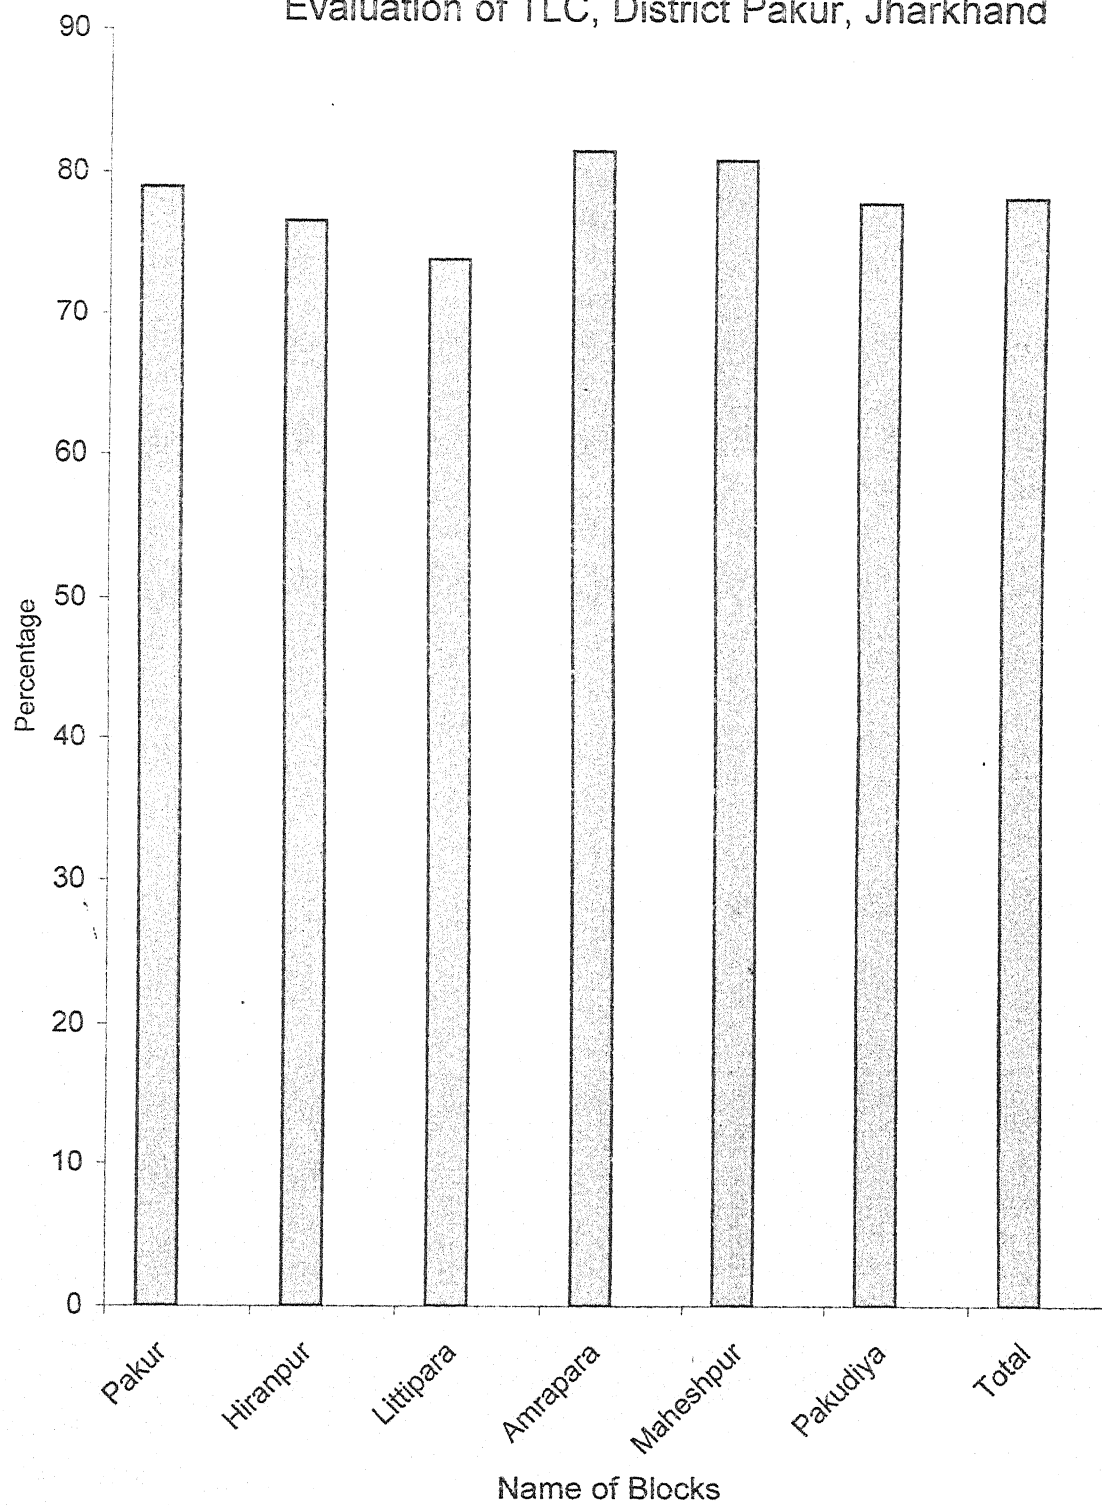

CHAPTER - III

LEARNING ACHIEVEMENTS

III.1 TEST RESULTS:

The performance of learners has been judged on the basis of their testing in reading, writing and arithmetic. The test papers as mentioned earlier have been prepared on the basis of model test papers suggested by the NLM by including some passages from the Primer-III *Apni Kitab* used by the ZSS, Pakur. The learning achievements have been analyzed as recommended by the NLM.

III.2 LEARNERS TESTED:

In the entire Pakur district, 8070 learners were taken as sample learners for testing. The sample learners (8070) constituted five (5%) per cent of all P-III learners in the district. The block-wise position of total tested learners, proxy learners and genuine learners, on the basis of which learners achievements have been examined, is as under:

Table III.1: **Block-wise Sample, Proxy and Genuine Learners Tested in Pakur District, Jharkhand**

Sl. No	Block	Learners Completed P-III	Total P-III Learners	Sample Learners

III.3 VILLAGES/WARDS SELECTED IN SAMPLE:

A total of thirty-five (35) villages and four (4) wards of the urban part of Pakur district constituted village/ward-wise sample size of the study. In these villages/wards, 11507 learners were the target learners and 9452 learners were the P-III learners (P-III studying + P-III completed). The block-wise sample villages/wards and their target and P-III learners have been shown in Table-III.2.

III.4   SUCCESS RATE OF LEARNERS IN THE DISTRICT:

The success rate of learners who included tested + absentee learners has been calculated as per Ghosh Committee recommendation. The details have been put in Table III.3. The calculation revealed that out of the sample learners, 76.69 per cent attained the NLM norms. In the total learners who completed P-III in district (P-III studying + P-III completed), 70.46 per cent obtained the NLM norms. As far the total target of the district was concerned, analysis showed that 56.85 per cent of them attained the NLM norms. The

GIDS, Lucknow

success rate of absentee learners was calculated as half of the success rate of the sample learners as recommendation by the Ghosh Committee.

Table III.3: **Success Rate of Learners in District Pakur, Jharkhand (Including Tested + Absentee Learners)**

Target	Primer III Learners	Sample Data								Pass Percentage	
		Target	Primer III	Appeared in Test	Proxy	Genuine	Number of Absentee	No. of Learners appeared	No AN	Out of Sample	Out of District Target
1	2	3	4	5	6	7	8	9	10	11	12
199840	161249	11507	9452	8070	141	7929 (Col.5-6)	1523 (Col.4-7)	Genuine = 7929 AB = 1523 Total=9452	Genuine = 6081 AB = 579 Total=6660	76.67	70.46 per cent of Col.2 = 133616 which is 56.85 per cent of Col.1

Note: 1. AN = Attained the Norms.
2. AB = Absentee
3. Calculation of AN among absentee learners has been done according to Ghosh Committee recommendations which is as follows:
Calculations

(a) Treated all of them as failed	— No
(b) Treated all of them as passed	— No
(c) Treated the percentage of passed among the absentees same as tested learners passed	— 76.70
(d) The pass percentage considered between the pass percentage of tested learners	— 38 per cent

III.5 SUCCESS OF LEARNERS AS PER NORMS:

On the basis of success rate of learners calculated as per Ghosh Committee recommendations, 56.85 per cent of the target learners in Pakur district achieved the NLM norms. Those who were P-III learners in the district, 70.46 per cent attained the

norms. In the sample, 76.69 per cent of the learners obtained norms as shown in the following table III.4.

Table III.4: **Learners Achievement as per NLM Norms in Pakur District, Jharkhand**

(Percentage)

Target Learners	Learners Studying P-III + P=III Completed	Sample
56.85	70.40	76.69

Source: Based on the learners tested.

III.6 STATUS OF PRIMERS COMPLETED:

As per data furnished by the ZSS, Pakur, 100 per cent of the enrolled learners reported to have completed P-I and P-II. The learners who were still studying P-III were 16.02 per cent and 83.98 per cent of the total learners completed P-III as evident in the following Table III.5.

Table III.5: **Status of Sample Learners According to the Primers Completed, ZSS, Pakur, Jharkhand**

	Learners Completed Primer-I	Learners Completed Primer-I	Learners Completed Primer-III	Learners Completed Primer-III

Table III.6: **Learners Achievements by Primers Completed, ZSS, Pakur, Jharkhand**

	P-III Studying	P-III Completed	Total
Percentage of Learners Attained the Norms	75.40	76.77	76.69

Source: Based on the tested learners.

III.8 ACHIEVEMENT BY CASTE-GROUPS:

The tested learners were analyzed according to different caste-groups to find the differences in their achievement level. The percentage of learners of different castes who achieved the NLM norms did not show much variation across different caste-groups as reflects from the following table III.7.

Table III.7: **Caste-wise Learners Achievements, ZSS, Pakur, Jharkhand**

	ST	SC	OBC	Minorities	General	Total
Percentage of Learners attained the NLM Norms	76.50	77.03	76.81	76.73	77.56	76.69

Source: Based on the tested learners.

The block-wise results according to caste-groups have been presented in Annexures VIII, IX, X and XI.

III.9 ACHIEVEMENT BY AGE:

Though the target group for Total Literacy Campaign is 15-35 years of illiterates but some of the learners below 15 years of age get enrolled for learning. The NLM has recommended that achievement of learners, therefore, be examined according to age-group

GIDS, Lucknow

Age-Wise Success Rate of Learners as per Final Evaluation of TLC, District Pakur, Jharkhand
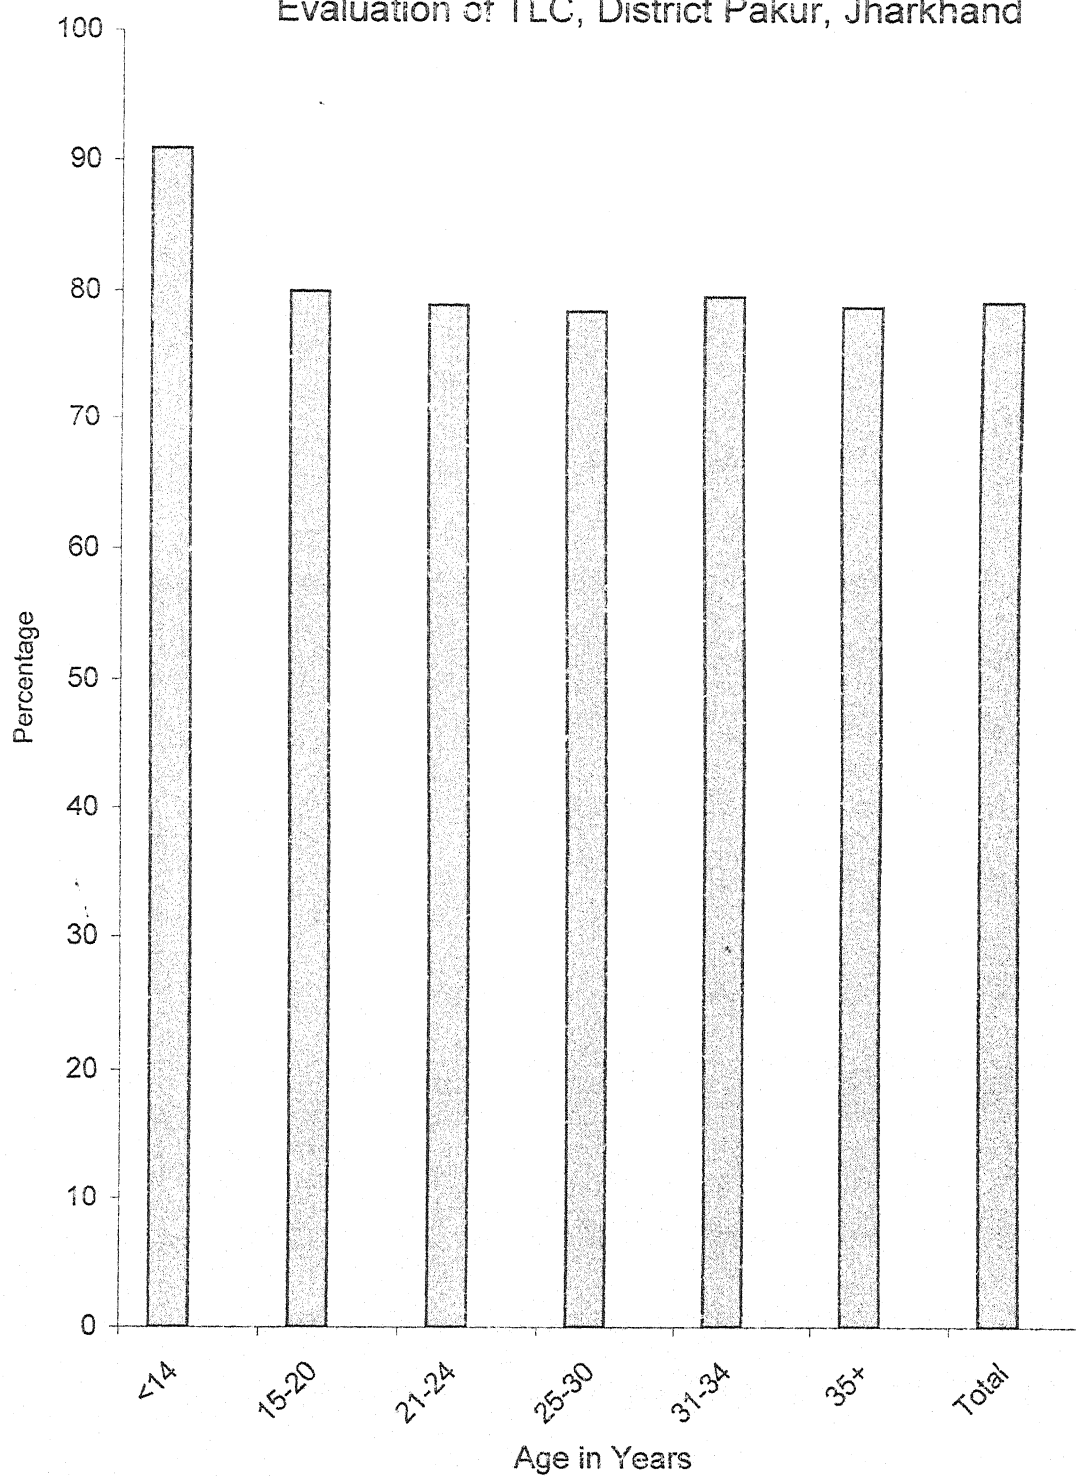

of 9-14 years and 15-35 years. Hence, the achievement of sample learners has been analyzed according to two age-groups of 9-14 years and 15-35 years in Table III.8.

Table III.8: **Learners Achievement by Age: ZSS, Pakur, Jharkhand**

	9 – 14 Years	15 – 35 years
Percentage of Learners attained the NLM Norms	76.00	76.69

Source: Based on the tested learners.

It becomes evident from the above table that no significant difference in achievement of learners between two age groups. The block-wise results have been shown in Annexures XII, XIII and XIV.

III.10 ACHIEVEMENT BY GENDER:

The achievement of tested learners was analyzed by gender. The result showed insignificant difference in achievement of male and female learners as evident in Table III.9.

Table III.9: **Learners Achievement by Sex: ZSS, Pakur, Jharkhand**

	Male	Female	Total
Percentage of Learners attained the NLM Norms	76.56	76.99	76.69

Source: Based on the tested learners.

The block-wise achievement of male and female learners has been placed in Annexures XV, XVI and XVII.

III.11 MARKS OBTAINED BY SAMPLE AND P-III LEARNERS:

The total marks obtained by the sample learners (aggregation of 3 RS) in different group of marks showed that 84.93 per cent of total genuine learners obtained more than 70+ marks. The percentage of learners who attained 0-49 marks was 3.66 and 2.98 per

Success Rate of Learners in Age-Group of 9-14 Years as per Final Evaluation of TLC, District Pakur, Jharkhand

1.	00 – 49	290	5898	3.66
2.	50 – 59	237	4820	2.99
3.	60 – 69	668	13585	8.42
4.	70 +	6734	136946	84.93
	Total	7929	161249	100.00

Source: Based on the tested learners.

The block-wise distribution has been presented in Annexures XX to XXV.

III.12 LITERACY SCENARIO OF THE DISTRICT:

Out of the total target of 199840 set for the TLC programme in the district, 113609 target learners could be made literates. An effort, therefore, be made to cover as many of them as possible during the Post Literacy Campaign phase. However, keeping in view the migration of the district, some of the target group members are bound to remain out of campaign. Therefore, there is little scope for the ZSS to enroll such learners. In Table III.11, literacy scenario of the Pakur district has been presented.

Table III.11: **Literacy Scenario of Pakur District, Jharkhand**

(a)	Effective Target of Non-Literates	199840
(b)	Qualified at the district level (at 56.85 per cent of 199840)	113609
(c)	Backlog [(a) – (b)]	86231

III.13 AVERAGE MARKS OBTAINED IN 3 RS:

The sample learners were classified in two score groups, i.e. 0-19 and 20-40 in case of reading, 0-14 and 15-30 in case of wiring and arithmetic. It became evident that 4.12 per

GIDS, Lucknow

cent of the tested learners obtained less than 19 marks in reading. In writing and arithmetic, 11.24 per cent and 7.00 per cent respectively attained less than 0-14 marks. In this way, 4 per cent tested learners in reading, 11 per cent in writing and 7.0 in arithmetic could not qualify to obtain fifty (50) per cent of the marks in each of the three 3 RS. The average marks obtained in reading, writing and arithmetic have come to 31.44, 21.40 and 25.96 respectively as evident in Table III.12.

Table III.12: **Number, Percentage and Average Marks obtained by Sample Learners, Pakur District, Jharkhand**

The block-wise number, percentage and average marks obtained have been placed in Annexures XXVI to XXXI.

III.14 COMPARISON OF SUCCESS RATE BETWEEN MALES AND FEMALES:

The comparison of success rate between male and female learners was made in order to find the gap between the two who could not attain NLM has been shown in Table III.13.

GIDS, Lucknow

It become evident that percentages of marks obtained by the females in comparison with the males were lower in reading, writing and arithmetic. The difference was by 2.56 percentage point in reading, 1.41 percentage point in writing and 7.48 percentage point in arithmetic at the combined level of the district. The block-wise situation has been presented in Annexures XXXII to XXXVII.

CHAPTER - IV

CONCLUSIONS AND SUGGESTIONS

IV.1 CONCLUSIONS:

The district of Pakur is most backward in terms of literacy in entire Jharkhand State. The majority of population in district is tribal which is socio-economically backward. Therefore, launch of Total Literacy Campaign assumes special significance in the district. The Total Literacy Campaign has ended on 31st December 2004 and just after it, final evaluation of the campaign was conducted by the Giri institute of Development Studies, Lucknow. The evaluation has revealed the following outcomes of the campaign:

(i)   The data provided by the ZSS, Pakur have revealed that more than 83 per cent of the target learners were enrolled for teaching-learning. Among the total learners enrolled, 57 per cent were the Scheduled Tribes/Castes learners.

(ii)   Out of the enrolled learners, more than 81 per cent completed Primer-III. This shows that ZSS, Pakur has been successful in completing the teaching-learning of very large number of learners to whom ZSS enrolled. The enrolment rate of SC/ST learners was found to more than 86 per cent which further indicates that ZSS, Pakur has been successful in addressing the illiteracy problem of large number of disadvantaged people of the district;

GIDS, Lucknow

(iii)   It was observed in the field that ZSS, Pakur developed an excelled team of volunteers right from district to block and to the village level. Even the female volunteers were found to be equally active as that of male volunteers.

(iv)   It was observed that ZSS, Pakur has successfully launched various environmental building activities in the entire district. The rural community which constitutes the near total population of the district was found to be largely aware of the importance and need of the literacy. The credit, certainly goes to the ZSS for vigorously managing the environmental activities during the campaign. Several memorable events like cycle rallies were organized which are found to be still fresh in the memory of the rural people.

(v)   It was also observed in the field that all teaching-learning materials was systematically supplied to the learners as and when required.

(vi)   The Concurrent Evaluation, conducted by the Vikas Bharti, Ranchi found a good performance of the TLC Campaign.

(vii)   The final evaluation was conducted by the Giri Institute of Development Studies, Lucknow during 4-12 January 2005.

(viii)   The sample of learners was drawn from the learners who completed Primer-III. The sample size was 5 per cent of all P-III learners of the district.

(ix)   The sample of the learners tested was spread in thirty five (35) villages and 4 wards of Pakur Nagar Palika.

(x)   The analysis of the test result revealed a good performance of the ZSS, Pakur in terms of the learners achieving the NLM norms.

GIDS, Lucknow

(xi)   The test result showed that in the sample, 76.67 per cent of the total tested learners obtained the NLM norms.

(xii) As far the calculation of success rate of all the P-III learners was concerned, 70.46 per cent of them obtained the NLM norms.

(xiii) In the sample P-III learners, 76.77 per cent was found to have obtained the NLM norms. The learners who were studying P-III, 75.40 per cent was found to have obtained the norms.

(xiv) The caste-wise learners achievement did show negligible variation. It implies that ZSS efforts have been uniform in imparting literacy skills to all caste-groups.

(xv)   Though under the TLC, target age-group was 15-35 years. However, some of the learners below the age of 15 years were also enrolled. When learners achievement was disaggregated into age-groups, negligible variation was noticed.

(xvi) The gender-wise learners achievement did not reveal any noticeable variation.

(xvii) It became evident that fairly higher percentage (84.93%) of the learners obtained more than 70+ marks in aggregate of 3RS.

(xviii) In the total target learners, around 35000 could not be enrolled and 28000 learners were at the end of completion of P-III. The ZSS will have to take care of around 23000 learners during its PL phase. However, keeping the employment and migration of the people in the district, this number becomes much lower. As the teaching-learning of such left over learners is still going on, it can be expected that ZSS will cover this target till the beginning of PL Phase. Those who will remain to be covered, need to be taken care of during the PL Phase.

GIDS, Lucknow

(xix) The writing has been the weak area of learners as compared to reading and arithmetic. Those obtaining NLM norms were quite higher in reading, arithmetic and writing as well.

(xx) The difference has been noticed in terms of success rate between males and female learners. Though not much wide, but ZSS need to focus on the female learners in general and for improving the writing skill of female learners.

IV.2 SUGGESTIONS:

On the basis of review of success rate of learners as became evident from the testing of learners, followings are recommended for consideration of the ZSS, Pakur for implementation:

(i) The result has revealed that ZSS, Pakur has been successful in achieving the objectives of Total Literacy Campaign.

(ii) The ZSS, Pakur has developed a very good network of team of volunteers. It was observed that some volunteers desire to get something in lieu of their services. It is suggested that the volunteers may be given preference in various government schemes, being implemented at the village level.

(iii) The President of the ZSS who is Deputy Commissioner of the District may take an initiative to instruct the departments of the district to give preference to volunteers in selection of beneficiaries of different schemes and the recommendations of the volunteers may be considered while selecting the target group as beneficiaries under various schemes.

(iv) The present Deputy Commissioner, Mr. Vaidehi Sharan Mishra, IAS and Mr. Madan Sen Gupta, JAS seem to be taking keen interest in the effective implementation of the

GIDS, Lucknow

literacy programme in Pakur district. The ZSS should obtain the guidance and involvement of these officers to make the literacy programme more result-oriented.

(v)   There is no doubt that the present Secretary of the ZSS, Pakur Mr Bhaskar Sarkar is a dedicated officer. He seems to be grossly involved so much so that we have generally found him working overtime. He has developed a good rapport with the volunteers and learners. Therefore, it is recommended that Mr. Bhaskar Sarkar should continue to remain the Secretary during the Post Literacy Programme.

(vi)   Though the ZSS, Pakur has demonstrated effectiveness as far enhancing the literacy among tribal women is concerned during the TLC phase, it is recommended that the same emphasis should continue during the Post Literacy phase as well.

(vii) The ZSS has formed some Self-Help Groups (SHGs). It was found that some of the groups have made remarkable success in terms of running of income generating activities. The ZSS, should start identify the successful groups and try to replicate their model during the PL phase.

(viii) The training component in income generating activities assumes crucial position during PL period. The ZSS needs to start identify the training areas just from now.

(ix)   It is recommended that the Post-Literacy Programme should be initiated as early as possible in Pakur district.

(x)   The ZSS, Pakur may obtain necessary guidance and support from the Giri Institute of Development Studies, Lucknow during its Post Literacy Programme for the effective and result-oriented implementation.
